April 2011

## NEW FROM ACUTRUSS

I am pleased to announce that AcuTruss has added an Engineering Division to our company. We are now able to provide engineering services for our customers in the following areas:

- Over height foundation walls
- Pad footings for concentrated loads
- Tall walls
- Steel and Wood Beam Design
- Steel and Wood Column Design
- Connection Details
- Garage floors
- Nadura Insulated Concrete Form Systems
- Lateral and/or Seismic Analysis including shear walls and tiedowns
- Schedules "B" and "C" as required by City or Regional District

Essentially - Total Engineering for Residential Construction and Agricultural Buildings.

Our intention is to combine all of the structural elements of your building together at one source. In doing so, we feel that we can offer a great benefit to our customers by resolving all structural issues prior to the permit application stage. Working in conjunction with our floor and roof truss technicians we feel that we can offer a seamless and complete solution to your structural engineering needs.

Our engineer, Keith Ohlhauser P.Eng, P.E., will work with all of our sales teams as required. He will maintain an office in our Kelowna location at 1909 Kent Road as well as our Vernon plant at 2003 43<sup>rd</sup> Street.

Please drop in or give us a call to see how Keith and our team can assist you with your engineering requirements. We look forward to sharing our extensive experience and professionalism.
